

Farm Yard Safety

Objective

Dividing a farm into zones, the children will identify hazards on a working farm and to recognise the different signs used to warn of danger.

Props

Each child can cut out and colour in the hazard signs in the Farm Safety Signs activity.

Getting Started

On a blackboard list the following 'Farm Yard 'Zones'. The Chemical Shed; The Slurry Pit; The Animal Pen; The Field; The Hay Barn and 'The Machinery Shed'.

Now divide the class into groups assigning one zone to each group. Ask each group to name the dangers typical to their zone. Write the answers down on the board under the 'zone' they would be found in. eg. Tractors, bulls, machinery, slurry, pesticides, electricity, etc. and to hold up the safety sign or signs relevant to each zone.

Ask the children if they can remember some of the safety measures for each zone, eg. What to wear with chemicals, agitation of slurry, etc. The pictures may help them!

Remember. some dangers may be prevalent in more than one zone!

The Farm Yard Zones – The Chemical Shed

Harmful

Explosive

Corrosive

Dangerous for the environment

Flammable

Toxic

Oxidizing

Radioactive

Biohazard

Poison

Oxidizing

General danger

Explosive

Flammable

Electrical hazard
